PROFESSIONAL SUMMARY

Marketing and Business Analyst with 2.5+ years of experience turning data into strategy. Proven track record of driving 25% inbound lead growth, 40% organic traffic increase, and 15x social media reach through data-led decisions. Skilled in campaign analytics, market research, KPI reporting, SEO strategy, and presenting insights to senior leadership. Experienced in coordinating cross-functional teams, managing content strategy end-to-end, and using tools like GA4, Power BI, Google Ads, and Meta Ads to support business growth. Combines analytical thinking with strong storytelling to translate complex data into clear, actionable recommendations.

CORE SKILLS

Analytics: GA4, Campaign Analytics, KPI Tracking, Funnel Analysis, Market Research, Competitor Benchmarking, ROI Reporting

Marketing: SEO & On-Page Optimization, Google Ads, Meta Ads Manager, Email Marketing, Content Strategy, Content Calendar Planning, Social Media Analytics

Reporting: Power BI, Excel (Pivot Tables, VLOOKUP, Dynamic Charts), Google Search Console, WordPress, Elementor

Technical: SQL (MySQL), Python (Pandas, NumPy, Matplotlib), Data Cleaning, Exploratory Data Analysis

Soft Skills: Stakeholder Presentations, Cross-functional Collaboration, Data Storytelling, Team Coordination, Strategic Insight Reporting

WORK EXPERIENCE

Marketing Analyst | Freelance – Self-Employed

May 2025 – Present

Independent marketing analytics consulting — strategy, insights, and content analysis for multiple clients

- Analyzed content performance data across multiple clients, identifying high-engagement formats and patterns — restructured content calendars based on insights, contributing to 15x Instagram follower growth for one client (100 to 1,500).
- Conducted SEO audits and lead funnel analysis — identified content gaps and drop-off points, translated findings into prioritized recommendations for non-technical business owners.
- Built weekly KPI dashboards in Excel tracking engagement, reach, and conversion metrics — enabling clients to make data-backed strategy decisions without deep technical knowledge.
- Performed exploratory data analysis on client datasets using Python (Pandas), generating insight reports and presenting findings in clear, visual, non-technical formats.

Digital Marketing Executive | StrongBox IT

Jan 2024 – Mar 2025

Solely managed entire marketing function — reporting directly to CEO, coordinating content writer, graphic designer, and junior marketer

- Led a team of 3 — content writer, graphic designer, and junior marketer — from 6 months into the role when senior manager left, independently maintaining all marketing operations and KPIs.
- Identified location-based keyword opportunities through GA4 traffic analysis; built and ranked keyword-specific landing pages using WordPress and Elementor — directly contributing to 25% inbound lead growth.
- Built and maintained GA4 dashboards tracking 15+ KPIs daily — traffic sources, lead quality, engagement rates, and conversions — presenting weekly performance reports to CEO and senior leadership.
- Drove 40% organic traffic growth through data-driven SEO content strategy and competitor benchmarking — identified and closed content gaps across key service pages.
- Analyzed LinkedIn content performance data — discovered newsletter posts generated 5x higher impressions than standard posts — shifted content strategy based on this insight, growing followers and subscriber base consistently.
- Created and managed monthly content calendars, email marketing campaigns, and social media strategy across Instagram, LinkedIn, and Facebook — growing company social media to 5,000 followers in 12 months.

Data Reporting Intern | StrongBox IT

Jul 2023 – Dec 2023

Analytics and reporting in a fast-paced startup — cross-team coordination from day one

- Analyzed GA4 website traffic and user behavior data to diagnose declining follower counts and poor page rankings — presented corrective recommendations directly to COO.
- Coordinated across technical, sales, and marketing teams — translated business needs into structured analytical reports and content performance frameworks.

PROJECTS

SQL Data Warehouse — MySQL + Medallion Architecture | 2026

- Built end-to-end data warehouse following Bronze → Silver → Gold architecture; designed star schema models for sales, customer, and product analytics.
- Cleaned and transformed data across 6 ERP & CRM tables — handled NULLs, duplicates, format standardization — ensuring full pipeline data quality.

EU Loneliness Survey Analysis — Python + Power BI | 25,000-Response Dataset | 2026

- Performed full data cleaning using Python (Pandas) with feature engineering — created generation groups, income categories, and social media usage segments for deeper insight.
- Built interactive Power BI dashboard revealing behavioral patterns across loneliness, age groups, and social media usage — designed accessibly for non-technical stakeholders.

Chennai Metro Ridership Analysis — SQL + Power BI | 3 Years Government Open Data | 2026

- Identified complete digital payment shift — paper tokens fell from 65% to 0.40% while smart cards grew to 51% over 3 years using SQL trend analysis.
- Created 2-page interactive Power BI dashboard with KPI cards, trend charts, and insight callouts — built for non-technical decision makers.
